Tangerang, Indonesia

About Me

Final Year Computer Science student with hands-on experience building enterprise AI systems across multiplatform applications and real environments. Through my previous internships, I've developed end-to-end machine learning pipelines and agentic AI systems. I'm seeking opportunities as a Software Engineer or Machine Learning Systems Engineer where I can design, deploy, and scale intelligent systems that bridge AI research with production infrastructure.

Education

President University

B.Sc Computer Science

GPA 3.79/4.00

Related Course: Mining Massive Datasets, ML in Production, Deep RL, Generative AI, ML with graph, Computer Vision

Cikarang, Indonesia

2023 - present

SMA Al - Fityan School Tangerang

Best Academic Student Graduated

3rd Winner at Math Research on LPB Banten UMN 2022

Tangerang, Indonesia

June 2023

Experiences

PT Homy Delapan Indonesia

AI Developer Intern

Skills: Next.js, Pytorch, Huggingface, vLLM, Autogen, Amazon Web Service

Developed a Next.js application for AI powered construction design helper leveraging multi agent system. The AI system developed is a compound of deployed finetuned small language model, deployed ranker model for retrieval, additional geometry algorithms and Large Language Model API integration that enable the automation of 2D CAD architectural layout generation. The system passed all given scenarios during end-to-end tests for floor plan generation agents, with the floor plan generation achieved 88.24% in IoU.

Tangerang, Indonesia

Sep 2025 - Jan 2026

PT Mattel Indonesia

AI in Manufacture Project

Skills: Pytorch, Roboflow, OCR, Object Detection, Scene Text Segmentation

Designed and developed a compound AI system for digital transformation of manufacturing systems in the packaging product inspection. The system passed all given scenarios during end-to-end tests, with each model developed achieving 85.3% in F1 score for text segmentation and 82.7% in map@50 for symbol detection.

Cikarang, Indonesia

March 2025 - Aug 2025

Organization

**President University Faculty Association (PUFA) Computing
Member of Student Development and Competition**

Cikarang, Indonesia
Sep 2023 - Sep 2024

Managed a preparation event program on helping faculty of computer science students in President University to compete in national and international competition.

Technical Projects

Antibody-Antigen Affinity Prediction

Skills: Pytorch, PyG, Graph Neural Network, Protein 3D Structure Prediction, Protein Language Model, Biopython

Trained and evaluated a Graph Attention Network based architecture model for predicting binding affinity of Antibody-Antigen prediction on protein data from ABRank benchmark. The implementation in this project is only using the hard-ag split and the model achieved 0.64 in complex unrelated eval and 0.66 in local perturbation eval, showing competitive performance in the split with the state-of-the-art model in the benchmark.

Telehealth: Mobile Healthcare Consultation and Telemetry App

Skills: Flutter, LLM, Langchain, Flask, Google Cloud Platform

Built a cross-platform mobile health app in Flutter that integrates LangChain via REST APIs to provide AI-driven health recommendations and product Q&A, featuring doctor chat, e-prescription and drug purchase flows, appointment scheduling, patient telemetry and a personalized health-tracking dashboard.

Leadership & Activities

**Social Support Program at Gema Insan Amanah Foundation
Project Manager**

Cikarang, Indonesia
Jun 2024 - Jul 2024

Planned and coordinated a social support program for a local orphanage in partnership with Gema Insan Amanah Foundation, including agenda, logistics, and budgeting. Led and scheduled volunteers to deliver educational, recreational, and mentoring activities that improved engagement and wellbeing for the children. Collaborated with foundation staff to assess needs, secure in-kind donations, and document outcomes to inform recommendations for future community programs.

**President University Big Data Challenge Competition Preparation
Project Manager**

Cikarang, Indonesia
Feb 2024 - Jun 2024

Managed and organized a preparation for Big Data Challenge (BDC) from Satria Data competition held by Indonesia Ministry of Education and Culture (Kemdikbud) that was participated by students from President University Faculty of Computer Science.

Others

Certification: Microsoft AI Product Manager, Microsoft AI & ML Engineering, AWS Cloud Solution Architect, Neo4j Professional Certificate, Neo4j Graph Data Science Certificate

Languages: English, Bahasa Indonesia
